LIST OF CONTENTS FOR VOLUME 29, 2002

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 Volume 29, Number 1 January

Contents

W.T. Kim and Y.I. Cho	1	A study of scale formation around air bubble attached on a heat-transfer surface
R.C. Aldredge	15	Taylor-Couette burner for studies of hydrodynamically unstable weakly turbulent premixed flames
A.V. Kuznetsov and M. Xiong	25	Dependence of microporosity formation on the direction of solidification
A.V. Kuznetsov and M. Xiong	35	Effect of evaporation on thin film deposition in dip coating process
L. Wang and B. Sunden	45	Performance comparison of some tube inserts
G.F. Naterer	57	Energy balances at the air/liquid and liquid/solid interfaces with incoming droplets at a moving ice boundary
J. Tscherry, P. Cooper and W.K. Soh	67	Flow generated by colliding laminar natural convection boundary layers
H. Gunes	77	Low-dimensional modeling of non-isothermal twin-jet flow
H.-M. Chou, R.-F. Horng and Y.-S. Liu	87	The effects of vibration and reciprocating on boiling heat transfer in cylindrical container
Y.K. Shen, J.J. Liu, C.T. Chang and C.Y. Chiu	97	Comparison of the results for semisolid and plastic injection molding process
S. Kim, M.C. Kim and K.Y. Kim	107	An integral approach to the inverse estimation of temperature-dependent thermal conductivity without internal measurements
T.-C. Shih, H.-S. Kou and W.-L. Lin	115	Effect of effective tissue conductivity on thermal dose distributions of living tissue with directional blood flow during thermal therapy
S. Kim and M.C. Kim	127	A scale analysis of turbulent heat transfer driven by buoyancy in a porous layer with homogeneous heat sources
M.S. Mohsen and B.A. Akash	135	On integrated solar water heating system
X.Y. You	141	Squire theorem with variable physical properties

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 Volume 29, Number 2 February

Contents

S.H. Lee and Y.I. Cho	145	Study of the performance of physical water treatment with a solenoid coil to prevent mineral fouling. Part 1: Effect of a side-stream filtration
S.H. Lee and Y.I. Cho	157	Study of the performance of physical water treatment with a solenoid coil to prevent mineral fouling. Part 2: Effect of air bubbles
B.R. Becker and B.A. Fricke	165	Hydrocooling time estimation methods
A.V. Kuznetsov and A.A. Avramenko	175	A 2D analysis of stability of bioconvection in a fluid saturated porous medium – estimation of the critical permeability value
D.G. Prabhanjan, G.S.V. Raghavan and T.J. Rennie	185	Comparison of heat transfer rates between a straight tube heat exchanger and a helically coiled heat exchanger
M.C. Kim, S. Kim, H.J. Lee, Y.J. Lee, K.Y. Kim and S. Anghaie	193	An experimental study of electrical impedance tomography for the two-phase flow visualization
S. Shin, Y.-N. Kim and J.-H. Lee	203	Viscosity and conductivity measurements for dilute dispersions of rodlike paraffin particles in silicone oil
M. Vargas, F.Z. Sierra, E. Ramos and A.A. Avramenko	213	Steady natural convection in a cylindrical cavity
L. Goldstein Jr., F.L. Fassani, A.A.B. Santos and C.A. Ferrari	223	Experimental study of secondary air diffusion effects on soot concentration along a partially premixed acetylene/air flame
A. Valencia	233	The effects on heat transfer of unsteady flow around two square bars mounted staggered in a plane channel
B.S. Yilbas, M. Kalyon and S.Z. Shuja	243	Parametric variation analysis on time corresponding to initiation and ending of evaporation during laser heating
J.L. Niu and L.Z. Zhang	255	Effects of wall thickness on the heat and moisture transfers in desiccant wheels for air dehumidification and enthalpy recovery
B. Kundu	269	An analytical study of the effect of dehumidification of air on the performance and optimization of straight tapered fins
A.K. Satapathy and R.K. Sahoo	279	Analysis of rewetting of an infinite tube by numerical Fourier inversion

INTERNATIONAL COMMUMICATIONS IN HEAT AND MASS TRANSFER

2002 Volume 29, Number 3 April

Contents

S. Fiedler, H. Auracher and D. Winkelmann	289	Effect of inclination on flooding and heat transfer during reflux condensation in a small diameter tube
A. Durmus	303	Heat transfer and exergy loss in a concentric heat exchanger with snail entrance
A. Barba, S. Rainieri and M. Spiga	313	Heat transfer enhancements in a corrugated tube
B. Yesilata	323	Temperature induced viscosity variation in polymeric flow
G. Xu and A. Nakayama	335	The concept of known-velocity boundary for automatic setting of boundary conditions
S.P. Das, S. Chakraborty and P. Dutta	345	Natural convection in a two-dimensional enclosure heated symmetrically from both sides
E. Buyruk	355	Numerical study of heat transfer characteristics on tandem cylinders, inline and staggered tube banks in cross-flow of air
S.-S. Chu and W.-J. Chang	367	Hybrid numerical method for transient analysis of two-dimensional pin fins with variable heat transfer coefficients
R. Nazar, N. Amin, T. Grosan and I. Pop	377	Free convection boundary layer on an isothermal sphere in a micropolar fluid
S. Wongwises, W. Duangthongsuk and P. Naphon	387	Tube-side two-phase heat transfer coefficients of refrigerant HFC-134a flowing through a fin-and-tube evaporator
J.L. Xia and T. Ahokainen	401	Three-dimensional flow and heat transfer in slag
C.L. Chang, C.D. Ho and H.M. Yeh	413	Cool thermal storage coupled with water treatment by normal freezing of dilute aqueous solutions
Y.K. Shen and W.Y. Wu	423	An analysis of the three-dimensional micro-injection molding

INTERNATIONAL COMMUMICATIONS IN HEAT AND MASS TRANSFER

2002 **Volume 29, Number 4** **May**

Contents

R. Delahaye, A. Bahloul and P. Vasseur	433	Influence of the Soret effect on convection in a binary fluid layer with a free upper surface
D. Lelea	443	Numerical heat transfer fluid flow through channels with fins with varying cross-section in the streamwise direction
C. Riverol and V. Napolitano	453	Estimation of the overall heat transfer coefficient in a tubular heat exchanger under fouling using neural networks. Application in a flash pasteurizer
S.-C. Chen, S.-M. Wang and W.-L. Liaw	459	Fast-response pressure regulation system for thin-wall gas-assisted injection molding
M.C. Kimtr, S. Kim and C.K. Choi	469	The effects of stable thermal stratification on the onset of double-diffusive convection
S.W. Ahn and K.P. Son	479	Heat transfer and pressure drop in the roughened equilateral triangular duct
R. Tsai and L.J. Liang	489	Inertial effect on aerosol particle deposition from an axisymmetric stagnation point flow approximation
Z. Zhu, X. Zhu and J. Sun	497	Numerical analysis of heat transfer in a photovoltaic panel, I: indoor cases
N.M. Rao, M. Mishra, B. Maiti and P.K. Das	509	Effect of end heat exchanger parameters on the performance of a natural circulation loop
J.S. Jayakumar, R.B. Grover and V.H. Arakeri	519	Response of a two phase system subject to oscillations induced by the motion of its support structure
R.E. Santander and V. Bubnovich	531	Assessment of mass and heat transfer mechanisms in unsaturated soil
M. Tuztas and A.N. Egrican	547	Mathematical model of finned tube heat exchangers for thermal simulation software of air conditioners
H. Xie and Z. Zhou	557	Numerical analysis on performance of passive heat removal from high temperature gas-cooled reactor using phoenics
I.A. Hassanien and M.H. Obied Allah	567	Oscillatory hydromagnetic flow through a porous medium with variable permeability in the presence of free convection and mass transfer flow

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 Volume 29, Number 5 July

Contents

S. Mahmud and R.A. Fraser	577	Inherent irreversibility of channel and pipe flows for non-Newtonian fluids
B. Yesilata	589	Effect of viscous dissipation on polymeric flows between two rotating coaxial parallel discs
N.F.P. Ribeiro, N.T. Machado, E.N. Macêdo, J.N.N. Quaresma and J.A. Lima	601	Integral transform approach in chemically reacting non-Newtonian flows
A.V. Pantaleão, C.R. DeAndrade and E.L. Zaparoli	611	The effect of anisotropic thermal conductivity on the pultrusion process simulation
F. Amyot, K. Jurski, J. Dufaux and G. Guiffant	623	An experimental and theoretical study of mass transfer from loaded embolisation microbeads: possible optimisation
S. Lorente and B. Lartigue	633	Maximization of heat flow through a cavity with natural convection and deformable boundaries
Y.K. Shen, S.L. Yeh and S.H. Chen	643	Three-dimensional non-Newtonian computations of micro-injection molding with the finite element method
H.A. Attia	653	On the effectiveness of uniform suction-injection on the unsteady flow due to a rotating disk with heat transfer
M.E. Arıcı	663	Determination and use of the optimal variation of pipe wall thickness for laminar forced convection heat transfer
Y.-T. Lin, M.-Y. Chen and S.-L. Ji	673	Convective heat transfer from the surface of a heat plate impinged by a reciprocating jet flow
R. Hadef and B. Leduc	683	Etude comparative de modeles a bas nombre de Reynolds dans la prediction d'un ecoulement a point de stagnation
S. Mahmud and R.A. Fraser	697	Irreversibility analysis of concentrically rotating annuli
S.P. Anjali Devi and R. Kandasamy	707	Effects of chemical reaction, heat and mass transfer on non-linear MHD laminar boundry-layer flow over a wedge with suction or injection
M. Bourich, M. Hasnaoui, A. Amahmid and M. Mamou	717	Soret driven thermosolutal convection in a shallow porous enclosure
G.Y. Han and D.L. Hetrick	729	A letter to the Editor

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 **Volume 29, Number 6** **August**

Contents

B.A. Fricke and B.R. Becker	731	Calculation of heat transfer coefficients for foods
D.G. Blinov, V.G. Prokopov, Y.V. Sherenkovskii, N.M. Fialko and V.L. Yurchuk	741	Simulation of natural convection problems based on low–dimensional model
M. Prud'homme and T.H. Nguyen	749	Parallel flow stability under a uniform heat flux: effect of the Prandtl number
T. Fang	757	An extension of Wien's displacement law for blackbody radiation
X. Chen and B. Xu	763	The Nusselt number and friction factor at the entrance of a micro-duct
M. Issa, K. Ishida and M. Monde	773	Mass and heat transfers during absorption of ammonia into ammonia water mixture
S. Kim, B.-J. Chung, M.C. Kim and K.Y. Kim	787	A note on the direct estimation of thermal properties in a transient nonlinear heat conduction medium
P. Naphon and S. Wongwises	797	An experimental study on the in-tube convective heat transfer coefficients in a spiral coil heat exchanger
S. Chantasiriwan	811	Steady-state determination of temperature-dependent thermal conductivity
A. Valencia, M. Cordova and J. Ortega	821	Numerical simulation of gas bubbles formation at a submerged orifice in a liquid
C. Yildiz, I.T. Togrul, C. Sarsilmaz and D. Pehlivan	831	Thermal efficiency of an air solar collector with extended absorption surface and increased convection
A.A. Ozalp and H. Umur	841	Flow and heat transfer measurements in laminar and turbulent convex surface boundary layers
M.H. Saidi and A. Moradian	853	Availability analysis for the homogeneous nucleation of a single bubble under electrohydrodynamic phenomenon
M.H. Rahimian and A. Pourshaghaghy	867	Direct simulation of forced convection flow in a parallel plate channel filled with porous media

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 **Volume 29, Number 7** **October**

Contents

S.K. Kim, J.G. Opperer and I.M. Daniel	879	Determination of permeability of fibrous medium considering inertial effects
Z.-H. Jin	887	An asymptotic solution of temperature field in a strip of a functionally graded material
K. Benhadji, L. Robillard and P. Vasseur	897	Convection in a porous cavity saturated with water near 4°C and subject to Dirichlet-Neumann thermal boundary conditions
S.H. Tasnim and S. Mahmud	907	Entropy generation in a vertical concentric channel with temperature dependent viscosity
M.C. Kim, S. Kim and C.K. Choi	919	Convective instability in fluid-saturated porous layer under uniform volumetric heat sources
Y. Shi, M.B. Ray and A.S. Mujumdar	929	Effects of prandtl number on impinging jet heat transfer under a semi-confined turbulent slot jet
C.D. Ho and C.K. Wang	939	Cool thermal discharge obtained by air flowing over melting ice with producing chilled air
H.M. Chou, R.F. Horng, Y.S. Liu and J.L. Wong	951	The effect of grooved pattern on enhanced boiling heat transfer in a cylindrical tank base with a constant surface area
Y.K. Shen and H.C. Lee	961	Three-dimensional simulation of flip chip encapsulation process
C. Kurtcebe and M.Z. Erim	971	Heat transfer of a non-newtonian viscoinelastic fluid in an axisymmetric channel with a porous wall for turbine cooling application
H.A. Attia	983	Hall current effect on the unsteady Von Karman problem with heat transfer
S. Mahmud, P.K. Das and N. Hyder	993	Laminar natural convection around an isothermal square cylinder at different orientations
S. Mahmud	1005	Free convection inside an L-shaped enclosure
R.N. Krikkis and P. Razelos	1015	The heat transfer from a rectangular fin with asymmetrical boundary conditions

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2002 Volume 29, Number 8 November

Contents

H. Feng	1021	Analysis of microwave assisted fluidized-bed drying of particulate product with simplified heat and transfer model
S.K. Kim and W.I. Lee	1029	An inverse method for estimating thermophysical properties of fluid flowing in a circular duct
I. Vušanović and M.J.M. Krane	1037	Microsegragation during solidification of Al-Cu-Mg alloys with varying composition
M.K. Groff, S.J. Ormiston, H.M. Soliman, V. Srzic and O.A. Ramirez-Iraheta	1047	An algebraically-explicit correlation for forced-convection condensation of steam-air and stream-hydrogen on horizontal plates
G. Xu and R.A. Antonia	1057	Effect of inital conditions on the temperature field of a turbulent round free jet
S. Shin and J.-H. Lee	1069	The effect of traversal vibration on the suspension viscosity
Y.C. Shiah and C.Y. Lin	1079	Anisotropic heat conduction involving internal arbitrary volume heat generation rate
M.C. Kim, S.B. Lee, B.-J. Chung and S. Kim	1089	Heat transfer correlation in fluid-saturated porous layer under uniform volumetric heat sources
A. Pinarbasi and M. Imal	1099	Nonisothermal channel flow of a non-Newtonian fluid with viscous heating
T.-M. Liou, K.C. Shih, S.W. Chau and S.C. Chen	1109	Three-dimensional simulations of the droplet formation during the inkjet printing process
A.J. Chamkha, T. Groşan and I. Pop	1119	Fully developed free convection of a micropolar fluid in a vertical channel
R. Nazar, N. Amin, T. Groşan and I. Pop	1129	Free convection boundary layer on a sphere with constant surface heat flux in a micropolar fluid
B. Madhu Latha, P.R. Prasad, S.S. Rao and V. Sujatha	1139	Studies on ionic mass transfer in a rectangular cell—influence of rectangular transverse baffles
L.C. Zheng, X.X. Zhang and J.C. He	1151	Tranfer behavior for a class of generalized *N*-diffusion equations in an infinite medium
A. Al-Sarkhi, B.A. Akash, J.O. Jaber, M.S. Mohsen and E. Abu-Nada	1159	Efficiency of Miller engine at maximum power density
S.S. Okoya	1169	On the behaviour of solutions to a system of ordinary differential equations modelling branched chain reaction
I. Atmaca, A. Yigit and M. Kilic	1177	The effect of input temperatures on the absorber parameters
	1187	Contents of Volume 29
	1195	Author Index to Volume 29
